

123Scan Suite for Retail

A software suite to make scanning simpler

Easy scanning suite that simplifies scanner setup and maintenance

Running a retail business is a juggling act, but tech expertise doesn't need to be one of the curveballs. With 123Scan Suite for Retail, any team member can set up scanners and automate workflows for better accuracy. Multi-location retailers also get remote management, host integration, and enterprise data collection to add more value.

The result is higher productivity, stronger returns, and improved performance.

Advanced functionalities delivered from Zebra

Real-time alerts

Deliver 99% device uptime with AI-powered asset management.

PowerPrecision+

Maximize scanner uptime with visibility into battery health and performance.

Virtual Tether

Never lose track of cordless scanners. Keep devices in play and costs in check.

IoT Connector

Gain real-time insights collected from your scanner to make real-time decisions.

DataWedge

One scanner, many workflows. Use it across apps without extra steps.

Remote Management

Update scanners from anywhere with just a click, and without interrupting your POS.

Supported operating systems

Works with the most common systems: Windows, Linux, Android, iOS, Citrix, and VMware.

Simplicity only from Zebra

123Scan

Set up and update scanners in just a few clicks.

GS1 Digital Link standard

Move from 1D UPC to 2D QR barcodes that contain more, like expiration dates, batch, and lot info.

Preferred Symbol

Scan only the barcode you need and skip the rest.

Advanced Data Formatting

Modify barcode data to meet your POS requirements.

OPOS and JPOS drivers

Drop a Zebra scanner into your POS and connect instantly.

Focus on customers, not scanners

A smarter suite of scanning tools keeps your team moving—and your customers happy

Concentrate on service, not setup

Whether you have 5 or 5,000 scanners, Zebra setup software tools get you up and running fast.

Keep scanners running from anywhere

Remote Management lets you update and troubleshoot scanners without pulling them off the floor. See battery health, push firmware updates, and keep devices performing at their peak.

Cut costs, save time

123Scan Suite for Retail (so we are consistent throughout the fact sheet) reduces the need for tech support, speeds up employee training, and helps prevent lost scanners with Virtual Tether. **The result:** lower costs and fewer disruptions.

Stop errors before they spread

Advanced Data Formatting ensures the right data is captured every time. No need to change your POS software to meet your ever-changing needs; just clean data flowing straight into your POS.

Power productivity

Make your demanding job more manageable with Zebra DNA for Scanners. You will find Zebra DNA for Scanners is built to help you easily set up, manage and optimize your Zebra scanners with confidence. This robust suite of software includes 123Scan Suite for Retail, tools that ensure continuous visibility, maximum uptime, and the agility to adapt to changing workflows.
