

8000T-E Semi-Gloss Deep Freeze

Semi-gloss paper label with 30% recycled content

For environmentally conscious business owners who need to find solutions that contribute to achieving sustainability targets, Zebra partners with major material suppliers to offer new products and solutions as they come to market. 8000T-E Semi-Gloss Deep Freeze paper labels have a machine coated, semi-gloss appearance and contain 30% recycled post-consumer waste providing a more sustainable solution without compromising on quality.

Print Confident. Print Quality. Print Zebra.

Printing supplies can impact everything from printhead lifespan to operational efficiency. That's why we design, produce and rigorously pre-test our own line of thermal printing supplies to ensure consistent, optimized performance. We utilize an ISO 9001 certified, 23-point inspection process and consistent materials to ensure reliable performance from order-to-order. No matter when you order your labels, you can count on the same consistent performance.

Designed for Cold and Deep Freeze Applications

The adhesive is designed for application at low temperatures and to withstand deep freeze temperatures, with good adhesion to a wide variety of surfaces including corrugated cardboard, films and curved or irregular surfaces. In addition, the adhesive has attained the one-star certification for bio-based content according to EN 16640, meaning that it contains certified Bio-based Carbon Content of at least 20%.

Minimum application temperature of -25°C and service temperature range from -50°C to 70°C.

Contribute to your sustainability goals without compromising on quality with 8000T-E Semi-Gloss Deep Freeze.
