

Scan to Network Premium

Business challenge:

When employees spend more time than necessary processing paperwork, it means there's less time to grow the business. That's why organizations need a convenient, efficient way to collect, enhance and route digital images of scanned documents.

Lexmark's advantage:

Scan to Network Premium allows you to preview, enhance and index images of scanned hard copies, and automatically route them to a shared network folder when using a Lexmark MFP. Using the intuitive touch screen, you can create high-quality images and confirm their delivery with thumbnails—without using a computer desktop.

What are the advantages of Scan to Network Premium?

- Enhance image quality
  - Use automated tools
- Separate scan jobs easily
  - Device determines when to start a new job
- Improve efficiency
  - Delete or insert new pages quickly
- Streamline the indexing process
  - Index files using on-screen prompts

Ideal for:

- Medical providers
- Law offices
- Retailers
- Schools
- Banks
- Insurance agencies
- Tax, accounting and financial advisors

Features:

Optimize image quality

Use automated preview and cleanup tools to remove speckles or defects; adjust contrast, darkness and skew; crop and save a specific area of a page; and rotate pages as needed.

Split multi-page scan jobs effortlessly

The Lexmark MFP recognizes where to split copies of multi-page scan jobs. Whether the user defines the number of pages or a barcode is used, the device can quickly determine when to begin each new copy batch.

Manage pages efficiently

Delete pages from the image file or insert new pages by scanning additional documents. In addition, use the blank page removal feature to automatically remove blank pages and reduce file sizes.

Simplify indexing

Index your files manually using on-screen prompts, extracting data embedded in bar codes, or a combination of both.

Part Number: 82S0082
Memory: Minimum of 1GB
Hard Disk: Required
