

Sell the Best:

Why Zebra DS4608 outperforms Mindeo MD6600

The DS4608 delivers best in class mid-tier performance, offering unmatched versatility and flawless scanning to keep checkout lanes running smoothly and transactions fast. When you sell the DS4608, you gain the peace of mind that comes with offering a proven product backed by a trusted global brand.

Faster, easier scanning

The DS4608 has what it takes to keep lines moving — from a class-leading scan range that easily reaches items at the bottom of a customer's cart to trouble-free scanning of mobile, small and challenging barcodes.

More versatility

Your customers can do more with the DS4608 — capture images of documents, capture data on GS1 labels, identify poor-performing barcodes that slow down checkout and more.

Less tech stress

With Zebra, your customers get far more than just hardware. Thanks to Zebra's 123Scan Suite of software tools, it's easy to get scanners up and running in no time — even without IT support.

Scan non-stop

Zebra scanners deliver the reliability your customers can count on, preventing downtime and keeping their businesses running smoothly.

How we stack up against the competition

FEATURE	ZEBRA DS4608	MINDEO MD6600	ZEBRA BENEFIT
			
EASIER SCANNING, HIGHER PRODUCTIVITY			
PRZM Intelligent Imaging technology	Yes	No	With Zebra's exclusive PRZM Intelligent Imaging technology, the DS4608 offers superior performance on challenging barcodes to reduce manual entry — increasing productivity and throughput.
Reading range (100% UPC)	0 in to 28 in 0cm to 71.1cm	0 in to 11 in 0cm to 28cm	The DS4608's scanning range is more than twice as large as the MD6600. This boosts productivity, as workers can reach more barcodes without needing to find the right distance to scan. It also reduces the need to move heavy or bulky items from the customer's shopping cart at checkout.
Minimum element resolution	3 Mil	4 Mil	With a lower minimum element resolution, the DS4608 is able to read denser barcodes, supporting the small and dense barcodes commonly found on specialty retail and manufacturing items, increasing versatility.
Eye-level scan feedback	Yes Direct Decode Indicator	No	With eye-level feedback, workers can instantly confirm a scan was completed without relying on the audible tone (which may not be easy to hear in loud environments) or pausing to check the scanner. Helps avoid delays and keeps lines moving.
EASIER TO DEPLOY AND MANAGE			
Durability	6 ft (1.8m) drops 2,000 1.6 ft (0.5m) tumbles	6.5 ft (2m) drops No tumble specification	While the MD6600 has a slightly higher published drop specification, it lacks a tumble test which simulates the real-world tumbling that occur after a fall — and can be a more accurate representation of the wear and tear a device will experience during real use.
Real-time business intelligence	Yes IoT Connector for Scanners	No	Only Zebra provides fully-automated real-time data collection that enables businesses to do more with their scanners by analyzing and acting on the data they provide.
Industry-preferred management tools	Yes 123Scan, Remote Diagnostics, SDK, Remote Management (SMS)	No	Partners call Zebra's 123Scan and SMS tools the best configuration and management tools in the industry, helping simplify remote management and accelerate roll-outs.
Warranty	5 Years	18 Months	The DS4608 is backed by a 5-year warranty — more than 3x longer than the MD6600.
