

With the DS8100-HC Series Scanners, healthcare providers can deliver the very best in care, every second of every day. This purpose-built imager gives healthcare professionals all the tools they need to improve patient outcomes and increase productivity.

Top 3 Features & Benefits

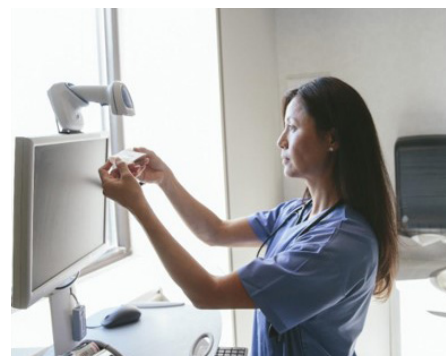

1. Better Patient Experience

- Zebra's exclusive PRZM technology ensures superior performance on all types of barcodes the first time
- Purpose-built housing eliminates bacterial hiding places. Disinfectant-ready plastics withstand the widest range of disinfectants.
- Switch between beep and vibrate mode with an on-the-fly press of the trigger to avoid waking sleeping patients
- Green LED aiming dot avoids eye damaging blue wavelengths and reduces the likelihood of provoking a PTSD episode

2. Better Clinician Workflows

- Swappable power source options: PowerPrecision+ battery or PowerCap Capacitor
 - PowerPrecision+ battery: Ideal for scanning whether the scanner is near the cradle or away for extended periods. It provides over three around-the-clock days of continuous scanning, plus a wealth of metrics for better battery management.
 - PowerCap capacitor: Ideal for scanning when the scanner is inserted into a charging cradle between scans. Offers 2,000 scans on a full charge.
- Choice of USB-powered cradle options with multiple mounting options allows you to easily switch between hands-free and handheld mode
- Presentation cradle magnet ensures charging contact, correct scanner placement, and flexible mounting options
- Cradle button locates a missing scanner in seconds
- Know when it's time to charge with Zebra's exclusive battery charge gauge

3. Unrivalled Manageability

- Easily configure your scanners with Zebra's complimentary 123Scan tools
- Remotely configure and update firmware with our Scanner Management Service (SMS)
- Proactively spot and replace only aging batteries, which lowers your Total Cost of Ownership (TCO) and decreases downtime with battery diagnostics
