Honeywell Announces the Launch of Granit™ Ultra Corded 2100i XLR and Cordless 2105i XLR Handheld Scanners

Honeywell is pleased to announce the launch of Granit Ultra Corded 2100i XLR and Cordless 2105i XLR Handheld Scanners.

The Granit Ultra Corded 2100i and Cordless 2105i XLR (Extreme Long Range) deliver maximum-range scanning performance across a wide range of barcode types and environments.

With high-performance technology and an optimized out-of-the-box configuration, the Granit XLR Ultra cuts scanning time in half versus the previous Granit generation.*

Granit Ultra 2100i and 2105i XLR Scanners

The XLR models read standard 10mil Code128 barcodes up to 3 meters (10 feet) and large 100mil Code39 barcodes up to 30 meters (98 feet).

The advanced imaging system ensures reliable barcode decoding in low light, direct light, and bright outdoor conditions. It supports steep-angle scanning, enabling accurate reads even on hard-to-reach labels. Additionally, it handles challenging barcodes such as shrink-wrapped, retro-reflective, and low-contrast labels with ease. These capabilities make it well-suited for demanding warehouses and industrial environments.

As part of the Granit Ultra family, the XLR model delivers the same ultra durability and ease of use.

*Based on Honeywell's standard testing method, the Granit Ultra XLR takes 40% as long as Granit XP XLR to read a range of codes.

NEW PART NUMBERS

ABOUT THE GRANIT ULTRA

ULTRA SCAN PERFORMANCE

For a scanner to optimize productivity, it should read and transmit common barcodes nearly as fast as the user can pull the trigger, and Granit Ultra is engineered to do just that. Granit Ultra integrates high-speed processing, AI (Artificial Intelligence) algorithms, and decoding enhancements to result in an average 45% scanning speed increase versus Granit XP*, enabling improved productivity.

ULTRA DURABILITY

In modern warehouse, distribution center, and manufacturing environments, any scanner must be durable enough to survive harsh operating conditions. Under exactly that kind of rough treatment, Granit is ready to deliver.

ULTRA EASE OF USE

Ready to operate right out of the box for many applications, Granit offers easy custom configuration in the time it takes to scan a barcode. For further workflow improvement, Granit can also read multiple codes in the field of view, organizing and outputting the data in a predefined order using Honeywell's Data Format Editor.

The all new charge and communication base is loaded with features to simplify common tasks. Easy drop-in charging makes scanner placement in the cradle fast and efficient for flat work surfaces; engaging the latching mechanisms helps ensure secure retention for vertical or vehicle mounting.

For additional information, please visit the Granit Ultra 2100i product page [HERE](#) or the Granit Ultra 2105i product page [HERE](#).

*Honeywell's standard benchmarking testing conducted on Granit Ultra SR and XR models vs. Granit XP on six collections of reference barcodes

REGIONS AFFECTED

- | | |
|--|--|
| ☒ Asia Pacific (APAC) | ☒ Middle East, Turkey, Africa (META) |
| ☒ Europe (EU) | ☒ Latin America (LATAM) |
| ☒ Greater China (GrCH) | ☒ North America (NA) |

TIMELINE OF EVENTS

ANNOUNCEMENT	DATE
First Order Date	Immediately
First Ship Date	30-September, 2025
Standard Lead Time	Consult your Honeywell Representative

PROTECT YOUR INVESTMENT

With Honeywell Repair Services, it's easy to get the level of repair coverage and protection that makes the most sense for your business. Honeywell repair service programs not only protect your device investment, but also provide predictable repair costs for the duration of your agreement. In addition to repairs, with every depot service we also provide required preventative maintenance, as well as relevant engineering, software, and firmware updates.

FOR MORE INFORMATION

Honeywell is committed to providing you with a superior level of customer service. Please contact your Honeywell representative for additional information regarding this communication.
