

Honeywell Announces Additional CK67 Configurations with New FlexRange™ ULR Ultra Long-Range Scanning

Honeywell is pleased to announce the launch of CK67 configurations with FlexRange ULR Ultra Long-Range Scanning.

Built on the newest generation of the Mobility Edge™ platform, a durable, stable, secure foundation for effective, long-lasting solutions, the CK67 delivers the lifecycle, security, and durability required by serious businesses. The CK67 is designed to endure the most challenging environments in warehouses and DCs. Warehouses are as busy as ever and operators need to keep their workflows running efficiently with maximum uptime.

The FlexRange ULR Ultra Long-Range scan engine is the latest innovation in long-range scanning. It offers an entirely new scan engine design, capable of scanning up to 100ft, with snappy responsiveness, in nearly every environment including Cold Storage. The FlexRange ULR Ultra Long-Range also offers a bright green laser aimer and improved barcode scanning performance in low-light environments and against reflective surfaces.

ABOUT THE CK67

CK67 mobile computers, built on the Mobility Edge platform, are ultra-rugged, all-purpose productivity devices ensuring reliable performance, ergonomic design, 5G, and Wi-Fi® 6E data connectivity for users in distribution centers and warehouses.

The CK67 is built on the Mobility Edge platform, a durable, stable, secure foundation for effective, long-lasting solutions. The CK67 delivers the lifecycle, security, and durability required by serious businesses. The CK67 harnesses the latest Qualcomm® QCM4490 processor and memory technology for high performance with guaranteed support through Android™ 18.

The CK67 has the latest 5G and Wi-Fi 6E chipset technology to stay connected in both indoor and outdoor environments. With the latest 5G release, CK67 offers the highest bandwidth, versatility, and lowest latency available for warehouse and DC workers to always stay connected. Whether you are on a private 5G or CBRS network or a Wi-Fi 6E environment, your workers can continue their workflows with the most reliable uptime. Each CK67 comes with a standard second Bluetooth® Low Energy (LE) and a USB-C port for alternate charging options or data transfer.

The CK67 is designed to endure the most challenging environments in warehouses and DCs. Warehouses are as busy as ever and operators need to keep their workflows running efficiently with maximum uptime. Users in warehouses can rely on the CK67, withstanding up to 8ft (2.4m) drops across operating temperatures and 4,000 3.3ft (1m) tumbles. Users can be confident with the intense durability testing the CK67 undergoes before release, that it will solidify and keep operations and is the ultimate long-term investment.

The CK67 comes in an updated form factor, with a sleek modern design, a larger screen, and a more ergonomic scan handle to satisfy most users and applications. The keypads have updated buttons for responsiveness and better spacing, for an enhanced user experience. The balance of the CK67 has been optimized to feel light in the hands of the users. The CK67 is a significant advance in a mobility device to enhance the user satisfaction.
