Honeywell Announces Update to CT45 & CT45 XP Products

As part of our ongoing efforts to optimize manufacturing and supply chain operations, the CT45 and CT45 XP products will now be produced in two separate locations. To reflect this change, we are introducing two distinct SKUs for the same product, differentiated by a country-of-origin indicator.

The last alphanumeric digit in the SKU will represent the country of origin:

- **“G” SKU** – Manufactured in **China**
- **“V” SKU** – Manufactured in **Vietnam**

While the product specifications and performance remain identical, the last letter in the SKU (G or V) serves as a manufacturing marker. This distinction is necessary to ensure accurate tracking, compliance, and logistics alignment across our systems and partner platforms.

ABOUT THE CT45 AND CT45XP

The CT45 is a versatile and comprehensive supply chain solution based on the new Mobility Edge™ platform. It is compact and designed for durability, worker comfort, and ease of use. The CT45 product family enables extended productivity and lifecycle. Enterprises are investing to keep up with demand and adapt to new ways of working. Built on the Mobility Edge platform, the CT45 XP and CT45 deliver a balanced offering to bridge the gap between e-commerce and digitalization, helping to synchronize the supply chain for retail stores, transportation companies, and distribution centers. Mobile workers often struggle to get up-to-date information in a timely manner to boost efficiency. In response, the CT45 XP leverages Wi-Fi® 6 technology to facilitate access to essential information with low latency, even in a highly dense connected environment. Delivery workers can now efficiently access the network outside of the four walls using 4G-LTE® advanced technology, helping mobile frontline workers remain always connected to crucial information to place orders, check stock, look up order status, or scan items.
