Honeywell Announces CT37 Healthcare Mobile Computer Has been Approved for Key Electronic Health Record (EHR) Systems

Honeywell is excited to announce the CT37 HC mobile computer has been approved for critical healthcare workflows by key Electronic Health Record (EHR) vendors such as Epic™, MEDITECH™, and Oracle Health™ (formerly known as Cerner).

These systems are used by hospitals and clinics, and help ensure patient information is handled with the highest standards of security, efficiency, and care.

AFFECTED SKUS

All CT37 HC SKUs are affected by this update.

ABOUT THE CT37 HC HANDHELD COMPUTER

The CT37 Healthcare (HC) is a multifunctional tool designed for healthcare institutions to support nurses and other caregivers in delivering care efficiently and safely. It is intended for professionals accustomed to using advanced personal mobile devices, and offers fast access to patient and therapy information, as well as voice, text, video communication, and scanning features.

The CT37 HC features a 6.0-inch full high-definition (FHD) screen within a slim and lightweight, yet durable design. Its curved form factor aims to meet the needs of various environments and improve handling to reduce the likelihood of accidental drops.

The CT37 HC also comes with the latest 5G and Wi-Fi® 6E technology to stay connected in both indoor and outdoor environments. 5G offers the highest bandwidth and lowest latency available for frontline workers. Whether you're using a private 5G or CBRS network, or operating in a Wi-Fi 6E environment—which extends the Wi-Fi 6 (802.11ax) standard into the 6 GHz band—your systems can maintain reliable workflows with minimal downtime. The CT37 HC supports 2nd BLE location technology and upgrades Bluetooth® to version 5.3, which includes various power-saving features and angle-of-arrival-based direction-finding capabilities.

The CT37 HC comes with a complete set of accessories, including universal dock chargers that can be field upgraded by the end-user without tools to support multiple Honeywell field mobility computers now and in the future. Other accessories include an easy-to-replace, true hot swap battery, a wearable accessory for hands-free use, an IH45 RFID handle for fast cycle counting, a ruggedizing boot, and a low-profile belt clip.
