

Zebra ZeroLiner Linerless Printing Solution

Enhance productivity, sustainability, and performance

Support your customers' sustainability ambitions with Zebra ZeroLiner Linerless Printing Solution. Like a roll of tape, linerless labels feature a silicone release coating on the top layer of the label with a special adhesive to eliminate the need for a label backing.

The design means that linerless rolls can include up to **50%** more labels with typically a **40%** decrease in shipping weight. Warehousing, transport and waste disposal costs are significantly reduced, while frontline teams also work with greater ease without the need

to peel liners, and change rolls as frequently. Their workspaces are cleaner and safer too as there are no slippery liners littering the floor.

The right label for the right printer
Linerless solutions can enhance operations throughout warehousing, retail, healthcare and manufacturing. Precisely manufactured and carefully wound to ensure seamless operation, and exhaustively tested for each Zebra printer, customers select from a range of high-quality labels.

Industrial printers

Select the **4500D** for high volume printing in challenging, warmer environments

Desktop printers

ZeroLiner desktop rolls are designed with an adhesive optimized for use with the Zebra desktop cutter.

Mobile printers

ZeroLiner **2000D** releases easily for a consistent feed and to avoid stressing the motor while also adhering well in application.

Find the best linerless solution for you
