

Transitioning from the MP7000 to the **MP72 Series**

As Zebra's latest bioptic scanner, the MP72 Series Multi-Plane Scanner/Scale sets a new standard in checkout convenience, ideal for both manned lanes and Self-Checkout (SCO) applications. You can count on the same proven reliability, energy savings and low total cost of ownership of the MP7000 — now with enhanced performance and even more innovation for faster transactions, higher levels of customer service and lower shrink.

Elevate every transaction with the MP72 Series — built for high-volume POS performance.

An Easy Migration. With three standard sizes, the MP72 Series is a drop-in replacement for the MP7000. It shares all the same management and deployment tools as the MP7000, providing a cost-effective path to the latest POS technology.

Future-ready with better 2D performance

Helps ready your checkouts for the rise of information-rich 2D barcodes

Faster, easier scanning with larger fields of view

Provides a simpler experience for both cashiers and self-checkout users

Optional HD color camera

Paves the way for computer vision applications such as loss prevention and produce recognition

Prevent underweight readings

Zebra Weight Guard reduces shrink by preventing underweight readings

Enhanced customer-facing scanner design

Gives shoppers a more user-friendly experience to scan their mobile loyalty cards and coupons

Better performance on mobile barcodes

Offset illumination reduces reflections that can blind the scanner, delivering better performance on reflective barcodes
