

The right support makes a big difference. Zebra OneCare™ engineers are qualified and knowledgeable, with access to Zebra's IP and resources.

Down-time costs money. The Zebra OneCare™ SLAs provide the service you need when devices or technology are compromised.

Choose the best plan for your business and maximize the 'Total Benefit of Ownership' of your Zebra technology.

As part of our commitment to a circular economy, we buy back devices that meet certain criteria.

Comprehensive cover for accidental damage as well as the latest security patches and O/S updates.

Avoid unbudgeted and ad-hoc repairs. For example, a 3 Year Essential Zebra OneCare™ Service contract costs less than one unplanned repair.

Zebra OneCare optimizes device performance, keeping your teams operational and productive.

You've invested in business-critical Zebra devices, but who's looking after them?

With Zebra OneCare™, be reassured that all support is completed by trained engineers, and updates and security patches are authorized. When your mobile computer devices, tablets and mobile printers are critical for operations and productivity, it makes sense to invest in a reliable support structure.

A 3 Year Essential Zebra OneCare™ Service contract costs less than one ad-hoc per incident repair (PIR).

There's no SLA with a PIR as it works purely on a first come, first served basis. Zebra OneCare™ is designed to minimise disruption to your business, by keeping devices healthy and continually operational. Just some of the benefits include:

- **Access to the latest security patches and updates**
- **Remote device diagnostics and technical support**
- **Defined target turnaround times for device repair**
