

Why upgrade to Zebra's next generation ShareCradle system?

Top 6 reasons to upgrade

1

You can double the capacity of your existing backroom.

With double density cups, you can charge twice the number of devices in the same ShareCradle.

2

You get ultra-fast Power Delivery (PD) charging.

Current ShareCradles charge batteries in about 3 hours. Now, with USB-C PD technology, compatible devices can charge from 0 to 70% in just 45 minutes.

3

It's even easier to upgrade to support new Zebra devices.

Just snap off the old cups and snap on the new cups for your current and new devices—no rewiring or special tools required.

4

Charging is safer by design.

Overcurrent, overvoltage and voltage-regulation safeguards help prevent overheating, reduce electrical fault risks, and protect the lifecycle of batteries and chargers.

5

More Ethernet support options.

The 5-slot and the 1-slot bases support Ethernet, providing more flexibility for charging and connectivity throughout your facility.

6

We paved the way for easy migration.

Compatibility with rack mounting brackets and device shims preserves your existing investment and allows you to migrate at your own pace.

Mix and match modular design

Charge the Zebra devices of today and tomorrow with a simple change of cups—no tools, rewiring or special skills required—just snap off and snap on.

How it works

Choose your cradle cups

Flexible cradle cups can be used as standalone chargers anywhere—on a desk or counter—or used with a base for more functionality.

Handheld Mobile Computer Cradle Cups

Choose a base for more functionality

Bases can provide charging only, Ethernet connectivity plus charging, or ultra-fast PD charging. And the 5-slot base is rack mountable.

ShareCradle Bases

1-Slot Base
Charge+Ethernet

5-Slot Base
3 bases: Charge Only, Charge+Ethernet or Ultra-fast PD Charge

Save time and money with pre-configured kits

Available for the most common multi-slot options

What do you get with ShareCradle pre-configured kits?

Major cost savings

—cost-effective migration

Ordering simplicity

—one SKU = a complete solution

Turnkey kits

—built for instant setup

More sustainable

—reduces packaging material
