

TC21-HC/TC26-HC Mobile Computer

A new level of features at a cost-effective price — built for healthcare

Affordably equip your entire staff with everything needed to improve operational efficiencies, task accuracy and the quality of care.

Integrated world-class scanning **NEW**

Optional SE4100 scan engine with healthcare-friendly LED aimer and illumination; count on the scanning performance that has made Zebra the market leader to improve task accuracy and minimize workarounds

4G LTE connectivity

Connect workers wherever they are — from home health workers in the field to hospital staff traveling between buildings; utilize public or private LTE networks on large campuses

More computing power **NEW**

Optional 2.2 GHz octa-core processor for maximum application performance and faster load times; get the power to run all your applications, including EHR apps from Cerner and Epic

Designed for constant disinfecting

Healthcare plastics withstand regular cleaning with 30+ disinfectants

Easily removable batteries

Dependable power every minute of every shift — just swap in a fully-charged battery for around-the-clock power

Easy device tracking **NEW**

Easily track or find missing devices; full-scale, cloud-based solution gives teams visibility into device location and status (optional)

Alert button for rapid response

When every second counts, one press of a button summons help

Accessories built for healthcare

Comprehensive family of charging cradles, battery chargers and intelligent lockers; wearable clips and handstraps

Zebra Mobility DNA™ Professional

Powerful pre-installed no-cost tools make devices easier to secure, deploy, manage and troubleshoot
