

Cut your Zebra device management costs with Zebra VisibilityIQ™ Foresight

You count on your Zebra mobile computers, scanners and printers to drive employee productivity, data capture accuracy and customer service quality up. But the more mobile devices you deploy, the higher the device management costs — unless you have Zebra's VisibilityIQ Foresight.

With VisibilityIQ Foresight, you'll spend less time managing devices, but have more visibility into more information on the health and utilization of your devices and their batteries all on a single dashboard. Armed with this wealth of data, you can easily and proactively predict and prevent device issues before they result in downtime, instead of react to device problems. Powerful predictive analytics help improve your operations, allowing you to forecast seasonal needs, ensure devices are fully utilized — and more.

VisibilityIQ Foresight pays for itself quickly by reducing the time and cost required to manage your Zebra devices.

The following pages provide the details, illustrating how this powerful device management solution makes sense for large enterprises.

Large Business Scenario

25,000 Devices | 50 Locations
