

Zebra VisibilityIQ™ Foresight for Printers

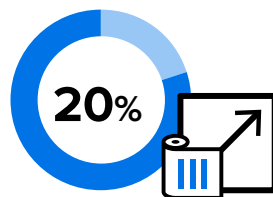

Operational insights for your printer fleet

Zebra VisibilityIQ™ Foresight

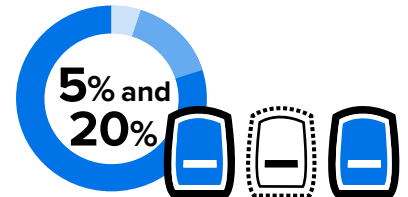

Powered by Zebra Savanna™

In a high-demand, competitive market, you may be facing challenges like an increasing workload, evolving technology and tighter deadlines, all while trying to stay ahead. You're bringing in more technology to keep pace, but more printers could mean more complexity and more time managing them.

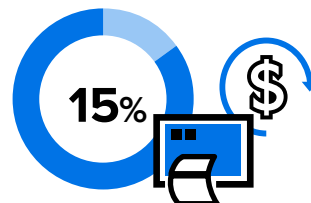

And without complete visibility into your fleet, you can face unexpected costs and downtime.

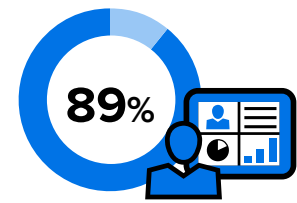

Many companies are running **20%** above or below their actual consumable print supply needs.¹

Annual mobile printer loss rates are between **5 and 20%**, impacting productivity. This includes lost, stolen, and hoarding of devices.¹

Purchasing media could be **up to 15%** more affordable if purchased ahead of time.¹

89% of executives say operational insights could significantly improve decision making.²

Do you have the necessary information and printer insights you need to improve efficiency and stay ahead of demand?

Know what printers you have, where they are, and how they're performing with Zebra VisibilityIQ Foresight for Printers.
