

Improve operations with proactive insights

ZEBRA VisibilityIQ Foresight

You're responsible for managing hundreds or thousands of devices, and when they're not performing at their peak, your operations suffer. Downtime, disruptions, and lost productivity, these are the stakes.

Enterprise Mobility Management (EMM) isn't enough—you need more. More power to prevent against downtime and costly repairs.

Imagine one dashboard that delivers real-time device health and utilization data across your entire device inventory, from mobile computers to printers to scanners* and even batteries. A solution that keeps your workers connected every shift, drives smarter, data-backed decisions, and empowers your teams to maximize uptime and streamline workflows.

All this, from one trusted partner and one intuitive solution: **Zebra VisibilityIQ™ Foresight.**

* Only certain models. Reach out to your Zebra representative for the complete list of covered devices.

Stay ahead of your business needs with Zebra VisibilityIQ Foresight

Prevent downtime, improve efficiency, and bring costs down with predictive insights and historical trends for your mobile computers, printer, scanners* and batteries.

Avoid workflow disruptions by discovering root issues

View device inventory, utilization, location, and performance

Access critical data on battery statistics and levels to prevent downtime

Keep teams connected with alerts

Track device repair cases and status

Proprietary algorithms help connect the dots so you can act smart and fast

Expand the impact of your EMM with insights

What if I have an EMM or in-house system already?

Zebra VisibilityIQ Foresight complements your system by integrating with your EMM to extract your data and combine ours to provide the actionable insights your current system can't provide on its own.

Even if you don't have an EMM, Zebra VisibilityIQ Foresight can still capture the data you need to derive insights.

5 Ways to Benefit from Zebra's VisibilityIQ Foresight APIs

1. Eliminate multiple data sources and interfaces
2. Create customized views
3. Integrate data into existing systems
4. Automate actions based on targeted insights
5. Get detailed support and repair statuses on your devices

Zebra VisibilityIQ Foresight provides value to your operations tailored to your business.
