

Zebra **VisibilityIQ** Foresight™

Improve Productivity with Predictive Insights

Presenter name
Jul. 2022

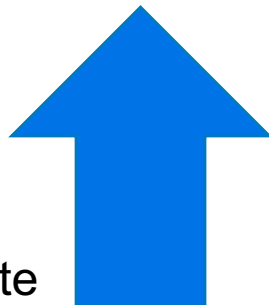

You're managing thousands of devices daily

From mobile computers to batteries and printers

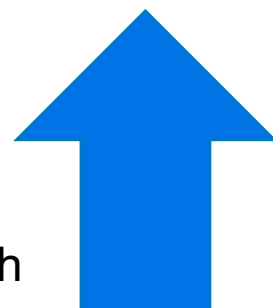

10%

Global mobile
printer growth rate

56%

Mobile computer
compound annual growth

89%

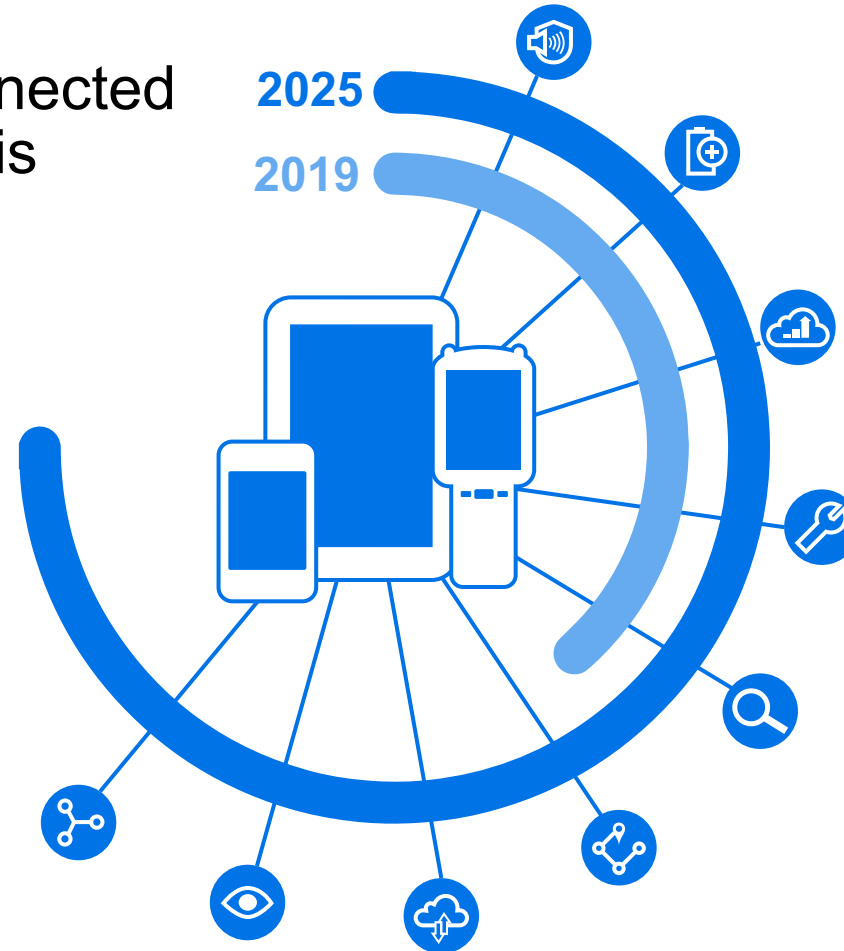

of executives say operational insights
could significantly improve decision making

And these numbers are expected
to grow even more...

The number of connected
devices worldwide is
forecasted to reach

75 billion
by 2025

An aerial photograph of a city, likely New York City, with a dense network of blue lines and nodes overlaid, representing a digital or IoT network. The nodes are connected by lines, forming a complex web across the city's buildings and streets. The background is a clear blue sky.

Do you have device visibility

To make informed decisions?

- Where are they?
- Are they fully charged?
- Are they readily available?
- How many are being repaired?
- How many are lost or stolen?
- How many technical support cases are open?
- How well are they connecting with the network?
- How are they being used?
- How many spares do we need?
- How is the rollout progressing?
- Do we have enough for peak season?
- Do we have the right amount at each location?

Without clear, complete and accessible device data

You're blindsided by problems

Work is Disrupted

- Battery failures
- Device issues
- Too few devices

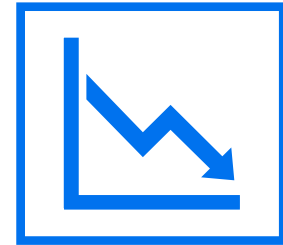

Devices Become Vulnerable

- Low battery
- Slow Wi-Fi connectivity
- Risk of device loss

Costs Rise

- Excessive inventory
- Unnecessary repairs
- Unplanned replacements

Productivity Drops

- Clinicians spend time troubleshooting or swapping devices
- IT scrambles to collect devices and data
- Unexpected demand changes

Get it all in one easy-to-use dashboard

with Zebra VisibilityIQ Foresight

Prevent downtime, improve efficiency and bring costs down with predictive insights and historical trends for your mobile computers, printers and batteries — all with Zebra VisibilityIQ Foresight.

View device inventory, utilization, location and performance

Access critical data on battery statistics to prevent downtime

Avoid workflow disruptions by discovering root of issues

Keep teams connected with threshold notifications

Track device repair cases and status

Turn reactive actions Into proactive data-driven decisions

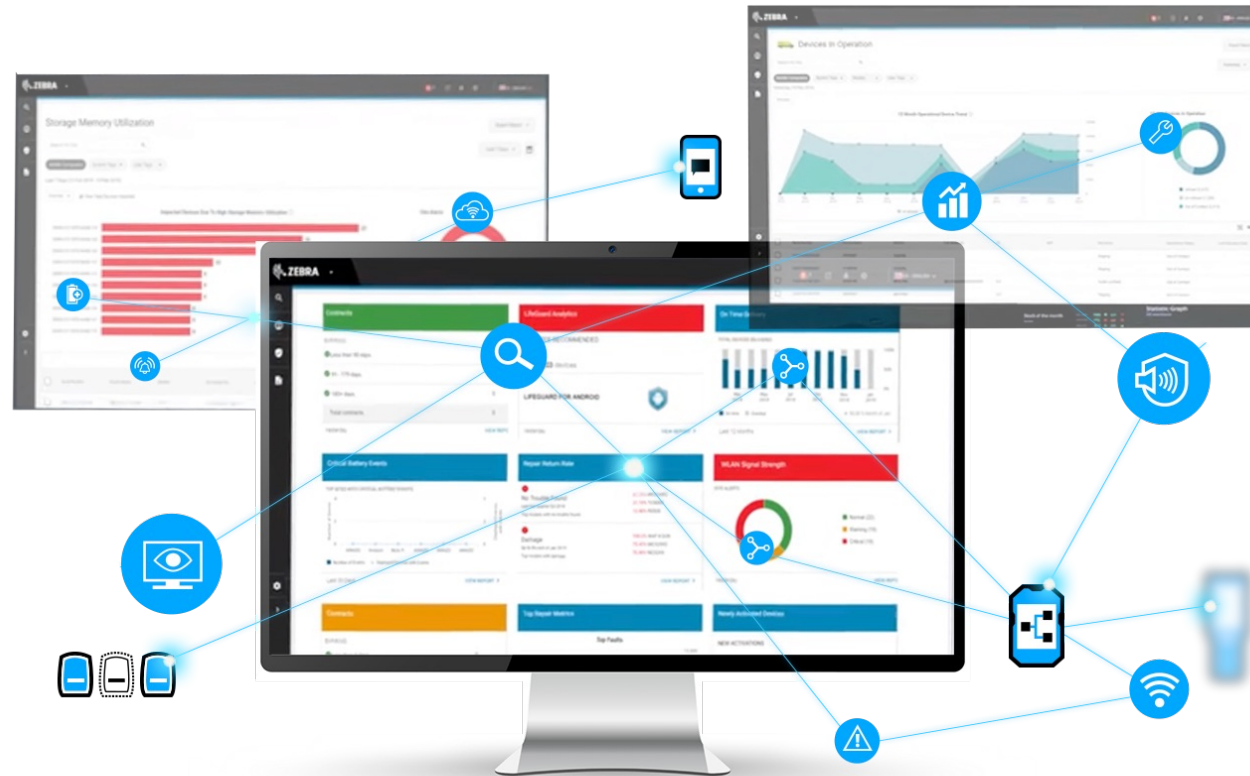

Zebra **VisibilityIQ** Foresight

Ensure devices are ready and available for 24/7 patient care

Forecast seasonal demands with utilization trends

Forgo guesswork for data-driven decisions

Predict issues before they impact productivity

Prevent device problems

with actionable intelligence

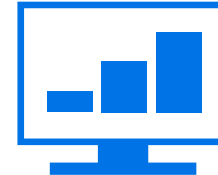

See the big picture

Zebra VisibilityIQ Foresight pulls from more data sources and stores it for longer time periods than any other service.

Consolidate data

It aggregates it all onto a single, color-coded, cloud-based, pane of glass.

Derive information

It collects historical data, so you can catch problems early on and forecast future needs.

Turn insights into action

It instantly translates big data into action-ready insight without an IT expert.

Scale smart insights

with Zebra's APIs

Get a more complete picture of your business by turning detailed device information into actionable insights.

Take advantage of Zebra's APIs by:

- Creating customized views
- Integrating data into existing systems
- Automating actions based on targeted insights
- Getting detailed support for your devices

Leverage key data points

to streamline your operations

Zebra offers a variety of options to tailor to your business.
