

ZEBRA Workcloud Sync

Forums

Workcloud Sync Forums enhances how your organization collaborates by creating a space to post broad communication to engage with your frontline workers. Whether it's a policy update, a change to store opening and closing procedures, or a celebration of top employees, Workcloud Sync Forums ensures that your employees are informed about the priority information that matters most.

Empower your workforce with real-time communication

With Workcloud Sync Forums, provide your frontline employees with important information in real time, and improve how your organization collaborates.

Communicate broadly by creating forum posts with text, attachments, images, video, and audio files.

Manage permissions to ensure that forum posts are always directed towards the right employees.

Send out forums in real time, ensuring that critical communications are immediately visible to the relevant employees.

Transform how your employees collaborate

Use Workcloud Sync Forums to connect your workforce and empower a more effective frontline.

Create an interactive space

Employees can react and comment on forum posts based on permissions, improving collaboration and employee morale.

Designate forum type

Subscribe specific users for private forums or create public forums visible to everyone on the All Forums page.

Easily locate relevant forums

Find forums at the push of a button by filtering based on name or keyword.

Assess forum performance

View statistics such as total users opened, read, viewed, and reacted in order to analyze how well forums are performing.
