

Enable a **more connected,** **more collaborative** front-line

Running an organisation is no easy task these days. Understaffed teams are overburdened with more responsibilities to tackle every day. In such a pressure cooker, there is no time to waste hunting for people or information.

Introducing Zebra Workcloud Sync, a unified and secure solution, purpose built for the front-line. From one single application, equip your front-line with push-to-talk, voice-and-video calling, and multimedia messaging, making information and care teams immediately accessible. That's how you engage and encourage your care teams to be their most efficient and effective.

Real-time collaboration. Real-time problem solving.

Gaps in communication, teams and information consume healthcare teams' time and focus. Workcloud Sync™ resolves that by consolidating all communication and collaboration efforts into one powerful application. With Workcloud Sync, your care teams are ready to solve problems on the spot and to save valuable time.

Empower your healthcare teams with a complete, collaborative experience

Forums

engages the front-line with interactive posts, enabling broad communication across the organisation

Video calling

Is the perfect complement of voice, helping care teams to connect remotely and collaborate visually

Chat

enriches collaboration with the ability to send 1:1 and 1:many messages with text, images, audio, and video in real-time

PBX telephony

Builds on voice calling by enabling care staff to take inbound calls directly

To-dos

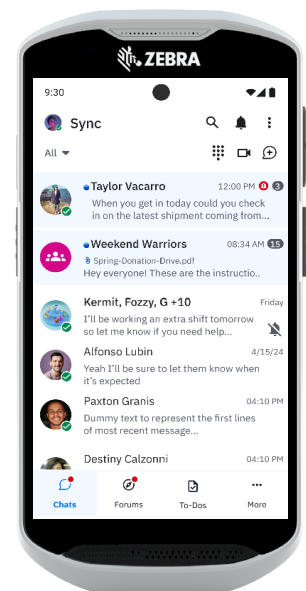

Streamlines the assignment and tracking of activities, prioritising work and enabling accountability with real-time visibility into task completion

Push to Talk

Instantly connects individuals, groups or teams across sites to coordinate everyday activities and immediately handle emergencies

Voice calling

Ideal for 1:1 and team calls, offering the convenience to hold, transfer, add ad-hoc callers, and more

Robust functionality that comes as standard

- Location tracking of workers inside and outside the four walls
- Role selection, enabling workers to dynamically switch roles
- Alerts and notifications to focus the front-line's attention
- Single sign-on to support shared devices
- Presence to clarify staff's availability
- Search from chat and tasks within the same field
- Analytics and reporting for actionable insight
- Language translation, key for today's multicultural workforce
- Central administrative hub for simplified IT management
- User directory for quick access to employees

Connect healthcare teams. Elevate care.

Remove the barriers to better patient care by connecting caregivers to each other and critical data, enabling real-time collaboration across your healthcare staff.

- Quickly coordinate the transfer of patients between departments
- Locate personnel for urgent matters and communicate emergencies based on location
- Override conversations to report and handle emergencies in real-time
- Give staff the ability to cover multiple roles and departments simply by accessing profiles on their devices

**Provide your patients
with the quick and
effective care that
they deserve.**

Respond to patients faster

- Use location tracking to know where nursing staff are and who can respond quickly to patient needs
- Communicate in real-time with the relevant nursing staff to ensure that patients are attended to as soon as they need assistance
- Take advantage of group calls and broadcast messaging to immediately reach the right healthcare staff

Keep employees safe

- Handle unsafe situations using the emergency duress button to quickly communicate with the relevant safety staff
- Utilise broadcast messaging to send critical information across the healthcare facility at a moment's notice
- Use emergency alerting to push safety-related priority messages to the top of your healthcare colleagues' notifications

Enable more flexible healthcare teams

- Empower a more agile healthcare workforce by giving them the ability to switch between multiple pre-defined profiles
- Cover labour gaps by quickly reallocating labour using profiles with pre-loaded call groups
- Simplify device management by allowing access to different profiles on a single mobile device

One device, endless possibilities

Pair Workcloud Sync with industry-leading Zebra devices and become an leader in front-line communication and collaboration. No more switching between applications on multiple devices. Leverage Workcloud Sync for a complete collaborative experience.

Combine Workcloud Sync with Zebra devices for the ultimate frontline productivity:
