

ZEBRA Workcloud Sync

Improve frontline collaboration and provide better patient care

Overworked and pushed to do more with fewer resources, today's frontline healthcare teams are under more pressure than ever before. That's why we've created Workcloud Sync, a transformative real-time collaboration platform that serves as a central hub for teams to communicate, share information, and connect on important activities. Sync up your frontline and provide care teams with the tools they need to give patients the world-class care they deserve.

How Workcloud Sync transforms collaboration for frontline care teams:

1 PBX-Integrated calling:
Answer incoming calls from family members and make calls to outside specialists from anywhere on campus.

2 Video/voice calls:
Securely share test results and diagnostic information with colleagues.

3 Forums:
Celebrate employee achievements, share best practices and post company news.

4 Multimedia chat:
Ensure a smooth transition between shifts with quick communication between caregivers.

5 Emergency communication:
Interrupt communication to send caregivers a duress alert.

6 Hands-free commands:
Enable staff to instantly connect to other care staff with voice commands.

7 Dynamic role selection:
Fill labor gaps by enabling nurses to easily select roles from their device and cover different departments.

8 Location tracking:
Route patient requests to the nearest and most qualified staff member.
