

Zebra Workcloud Sync™

Improve Frontline Collaboration and Increase Worker Productivity

Overworked and pushed to do more with fewer resources, today's frontline manufacturing and warehouse workers are under more pressure than ever before. That's why we've created Workcloud Sync, a transformative real-time collaboration platform that serves as a central hub for teams to communicate, share information, and connect on important activities. Sync up your frontline with the tools they need to work effectively as a cohesive team and improve their efficiency and productivity.

How Workcloud Sync Transforms Collaboration for Frontline Workers:

- 1 Push to Talk:**
Instantly reach individuals or groups to remediate production issues. Coordinate loading and unloading with instant communication.
- 2 Video Calls:**
Give workers the opportunity to take team calls and receive important information from anywhere on the warehouse floor.
- 3 Multimedia Chat:**
Easily communicate by text even in the noisiest environments.
- 4 Notifications and Alerts:**
Increase uptime with machinery and vehicle maintenance alerts.
- 5 PBX-Integrated Calling:**
Untether managers from their desks; enable them to make and take outside calls from anywhere on the plant floor.
- 6 Location Service:**
Locate drivers on a map to easily reassign routes as needed.
- 7 To-Dos:**
Get rush orders out the door with streamlined task assignment and automatic progress alerts.
- 8 Emergency Duress:**
Keep teams safe with emergency duress communication that bypasses existing calls to take care of emergencies quickly.
