

Are Your Mobile Printers Built for Patient Safety?

Find Out What's Transforming Specimen Collection.

Can a mobile printer make patients even safer? Yes, if it's built for accuracy, non-stop service and security. Anything short of that and it could jeopardize patient care. See if your needs have surpassed your mobile printers' capabilities.

Symptoms of a mobile printer that's hindering patient care:

- ✗ Less patient time due to long boot-up time
- ✗ Guesswork that sends printers to IT for help
- ✗ Batteries that drain mid-shift
- ✗ Weak Wi-Fi™ that limits productivity and care
- ✗ An invitation for security breaches

Advance specimen collection:

- ✓ Wait on patients not on printers, thanks to the instant-wake feature
- ✓ Keep printers in service instead of in IT service with a friendlier design
- ✓ Fight germs with a disinfectant-ready printer
- ✓ Extend your battery life by drawing power from your cart on wheels using Zebra's AC powered Battery Eliminator solution
- ✓ Tighten security measures to protect patient data

As Powerful as Ever

The ZQ600 Plus Healthcare Series
is Built to Improve Patient Care

Deliver the Best Patient Care
with the ZQ600 Plus by Your Side.
